C-55 .. Case, .. fits MKS-10,	145.00

GUILD FLAT-TOP PICK UP SYSTEM

Tass pick-up system by Fishman is available in all Guild Flat-tops. Tass features an active circuit w/pre-amp, EQ tone control, master volume control. Ultra thin crystal slabs are used which bend with the bridge saddle vibration, accurately tracking its motion, and reproducing the natural sound of the guitar. The EQ Tone Control and pre-amp afford an unsurpassed versatility making it possible to get country, jazz and rock sounds. The pre-amp has a specially designed stage circuit which includes complete buffering, highly advanced micro pre-amp op-amps for maximum battery life - 9 months or 8,000 hours. Tone control is independent and will not affect over all volume. Pick-up gives a balanced response regardless of string gauge used.

** Add \$150. to list of any Guild Flat-top for Tass P.U. (D-25E, etc.)

MAHOGANY RUSH
