ELECTRIC/ACOUSTIC GUITARS: The New Guild Flattop pickup system is available on all Guild acoustics. This system features new crystal slabs which bend with the bridge saddle vibration, accurately tracking its motion and reproducing the natural sound of the guitar. The tone control is independent and will not affect overall volume. This pickup offers excellent versatility, making it possible to achieve Country, Jazz and Rock sounds. The Guild Pickup delivers a balanced response regardless of string gauge used.

Guild Pickup System.....Add \$150.00

All Guild guitars are hand crafted in our factory. Because of Guild's continuing commitment to producing the highest quality guitars in the world, specifications and prices are subject to change.
